

Diazinon 60% EC

Emulsifiable concentrate

Description:

Highly effective insecticide used against ectoparasites in the form of an Emulsion concentrate.

Non-systemic contact, gastrointestinal and respiratory insecticide to control ectoparasites such as lice, fleas, spiral worms, flies, scabies and ticks on sheep, cows, camels and other farm animals and in stables and animal houses.

Composition:

Diazinon w/v	60%
Carrier	up to 1 liter

Usages, Methods and rates of use: -

Insecticide of organophosphorus group, used to combat external parasites on various animals by spraying or dipping after diluting it with water in the following proportions:

1. Spraying on barn floors and surfaces:

- Animal pens: diluted with water in a ratio of 1:29 and used at a rate of 50-100 ml / m² of spray emulsion as (1-2 g active ingredient / m²) depending on the type of surface treated and the period of survival of the pesticide.

Note: the absence of animals in the barns during the spraying process.

- Various animals: diluted with water by 1-1000 and should not spray the head, and not to spray lactating females and not to breastfeed the young on the day of spraying.

2. Immersion

- Large animals (cows and camels): diluted with water by 1-1000 and replace the emulsion that is lost with use by adding a new emulsion and then diluting it with water in the same proportion.
- Young animals (goats and sheep) diluted by 1-2000 and covered with this emulsion and when the lost water is compensated a new pesticide emulsion is added to the dipping basin and in the same concentration.

Cautions: -

- Use only for animals mentioned in the label
- Keep out of reach of children, food and drink
- The pesticide should be used immediately after diluting it with water and not storing it for the next day.

- The pesticide should not be used after its expiry of its shelf life.
- Do not treat sick, exhausted, weak or young animals.
- Toxic to poultry, cats, fish, bees and birds.
- The contents of open packages should be used within three months.

Withdrawal Period (Security Period):

Meat: 14 days

Milk: 3 days
